DEPARTMENT OF LABOR

Office of Workers' Compensation Programs

Energy Employees Occupational Illness Compensation Program Act of 2000, as amended

AGENCY: Office of Workers' Compensation Programs, Labor.

ACTION: Notice of revision of listing of covered Department of Energy facilities.

SUMMARY: The Office of Workers' Compensation Programs (OWCP) is publishing a list of Department of Energy (DOE) facilities covered under the Energy Employees Occupational Illness Compensation Program Act of 2000, as amended (EEOICPA). This notice revises and republishes the listing of DOE facilities that was last published by OWCP on November 24, 2010 (75 FR 71737) to include additional determinations made on this subject through [insert date of publication].

FOR FURTHER INFORMATION CONTACT: Rachel P. Leiton, Director, Division of Energy Employees Occupational Illness Compensation, Office of Workers' Compensation Programs, U.S. Department of Labor, Room C-3321, 200 Constitution

Avenue, N.W., Washington, D.C. 20210. Telephone: 202-693-0081 (this is not a toll-free number).

ADDRESSES: OWCP welcomes comments regarding this list. Individuals who wish to suggest changes to this list may provide information to OWCP at the following address: U.S. Department of Labor, Office of Workers' Compensation Programs, Division of Energy Employees Occupational Illness Compensation, Room C-3321, 200 Constitution Avenue, N.W., Washington, DC 20210. You may also suggest changes to this list by e-mail at DEEOIC-Public@dol.gov. You should include "DOE facilities list" in the subject line of any e-mail containing comments on this list.

SUPPLEMENTARY INFORMATION:

I. Background

The Energy Employees Occupational Illness Compensation Program Act of 2000, as amended (42 U.S.C. 7384 et seq.), was originally enacted on October 30, 2000, and the primary responsibility for administering EEOICPA was assigned to the Department of Labor (DOL) by Executive Order 13179 (65 FR 77487). In section 2(c)(vii) of that Executive Order, DOE was directed to publish a list in the Federal Register of Atomic Weapons Employer (AWE) facilities, DOE facilities, and facilities owned and operated by a Beryllium Vendor (as those terms are defined in sections 7384l(5), 7384l(12) and 7384l(6) of EEOICPA, respectively). Pursuant to this direction, DOE published a list of

these three types of facilities covered under EEOICPA on January 17, 2001 (66 FR 4003), and subsequently revised and republished the entire list on June 11, 2001 (66 FR 31218), December 27, 2002 (67 FR 79068), July 21, 2003 (68 FR 43095) and August 23, 2004 (69 FR 51825). In subsequent notices published on November 30, 2005 (70 FR 71815), June 28, 2007 (72 FR 35448), April 9, 2009 (74 FR 16191), August 3, 2010 (75 FR 45608), May 26, 2011 (76 FR 30695) and February 6, 2012 (77 FR 5781), DOE further revised the August 23, 2004 list by formally removing a total of fifteen AWE facilities without republishing the list in its entirety.

Following the amendments to EEOICPA that were enacted as subtitle E of Title XXXI of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005, Public Law 108-375, 118 Stat. 1811, 2178 (October 28, 2004), OWCP promulgated final regulations governing its expanded responsibilities under EEOICPA on December 29, 2006 (71 FR 78520). One of those regulations, 20 CFR 30.5(x)(2), indicates that OWCP has adopted the list of DOE facilities that was published by DOE on August 23, 2004, and notes that OWCP “will periodically update this list as it deems appropriate in its sole discretion by publishing a revised list of covered [DOE] facilities in the Federal Register.” In making these updates, § 30.5(x)(1) specifies that the Director of OWCP is solely responsible for determining if a particular work site under consideration meets the statutory definition of a Department of Energy facility. This sole responsibility is derived from the grant of primary authority to DOL to administer the EEOICPA claims process contained in section 2(a)(i) of Executive Order 13179.

II. Purpose

Since OWCP last published a notice listing all DOE facilities covered under EEOICPA in the Federal Register on November 24, 2010, the Director of OWCP has made several determinations regarding the status of work sites in connection with claims filed under EEOICPA. Those determinations are briefly described in this Supplementary Information and are memorialized in the two updated lists of DOE facilities published by OWCP today.

The Director has determined that the Dayton Project (Units I and III in Dayton, Ohio and Unit IV in Oakwood, Ohio) meets the definition of a Department of Energy facility for the purposes of EEOICPA. Also, based on remediation activities that occurred pursuant to the Uranium Mill Tailings Radiation Control Act of 1978, 42 U.S.C. 7901 et seq., the Director has determined that the following work sites meet the definition of a Department of Energy facility during the periods that such remediation activities took place: the Uranium Mills in Monument Valley and Tuba City, Arizona; the Climax Uranium Mill in Grand Junction, the New and Old Uranium Mills in Rifle, the Uranium Mills in Gunnison, Maybell and Naturita, and Uranium Mills No. 1 (East) and No. 2 (West) in Slick Rock, Colorado; the Uranium Mill in Lowman, Idaho; the Uranium Mills in Ambrosia Lake and Shiprock, New Mexico; the Uranium Mill and Disposal Cell in Lakeview, Oregon; Vitro Manufacturing (Canonsburg) in Canonsburg, Pennsylvania; the Uranium Mill in Falls City, Texas; the Uranium Mill in Mexican Hat, Utah; and the Uranium Mills in Converse County (Spook Site) and Riverton, Wyoming.

In addition, OWCP's research has led the Director to clarify or otherwise modify the designation of three work sites that were previously included in OWCP's published lists. The first site, which was previously listed under Utah as the Uranium Mill in Moab, now appears as the Uranium Mill in Moab (Atlas Site) in this listing. The second site, which was previously listed as the Nevada Operations Office, now appears as the Nevada Site Office. These two clarifications do not have any effect on the status of the two work sites in question, and are only intended to more precisely identify those facilities. The third facility, the Weldon Spring Plant, which is a facility with multiple locations in Weldon Spring, Missouri, has been divided into separate facilities and now appears in the lists published today as the following three facilities: the Weldon Spring Plant; the Weldon Spring Raffinate Pits; and the Weldon Spring Quarry. By dividing this third facility into three separate DOE facilities, OWCP will be better able to distinguish between the different operational periods of these locations, and will be able to more reliably obtain employment verification from the many different contractors that performed work at each location.

By updating the two lists found below, OWCP is presenting the public with the most current listing of DOE facilities in order to assist potential claimants and their families. OWCP is continuing its efforts in this area as it adjudicates claims filed under EEOICPA, and further revisions of these lists should be expected. Although DOE maintains a website (<http://www.hss.energy.gov/healthsafety/fwsp/advocacy/facility/findfacility.cfm>) that provides information on AWE facilities, Beryllium Vendor facilities and DOE facilities to the public, the information on that website regarding DOE facilities should not be relied upon as it may not be up to date, nor is it binding on OWCP's adjudication

of claims filed under EEOICPA. Instead, OWCP is solely authorized to give the public notice of the Director's determinations regarding DOE facilities.

III. Introduction to the Lists

The five complete lists previously published by DOE included all three types of work sites described in Executive Order 13179, i.e., AWE facilities, Beryllium Vendor facilities, and DOE facilities. However, the lists published on June 23, 2009, November 24, 2010 and again today by OWCP only include work sites that meet the definition of a Department of Energy facility, because the authority to designate both AWE facilities and Beryllium Vendor facilities has been granted to DOE. However, since some work sites can meet the definition of more than just one type of covered work site during either the same or differing time periods, simply presenting one list of DOE facilities (without also differentiating among them in some easily understood fashion) could lead the reader to wrongly conclude that a listed work site has always been a DOE facility when, in fact, it only had that status during a brief period. To lessen the potential for this type of misunderstanding, OWCP has decided to continue its practice of presenting two separate lists of DOE facilities.

The first list consists exclusively of work sites that have only been DOE facilities for purposes of coverage under EEOICPA, and the second list consists of work sites that have also been at least one other type of covered work site in addition to a DOE facility. To see what other types of covered work sites the DOE facilities appearing in the second list are or have been, readers can refer to the Federal Register notices published by DOE

on August 23, 2004 (69 FR 51825), November 30, 2005 (70 FR 71815), June 28, 2007 (72 FR 35448), April 9, 2009 (74 FR 16191), August 3, 2010 (75 FR 45608), May 26, 2011 (76 FR 30695) and February 6, 2012 (77 FR 5781). Since covered time periods for a particular DOE facility are statutorily limited to periods during which “operations” are or were performed by or on behalf of DOE (or its predecessor agencies) at that DOE facility, and when DOE (or its predecessor agencies) either had a proprietary interest in the facility or had entered into a particular type of contract with an entity regarding the facility, the lists below include date ranges during which covered employment at each work site could have been performed. These date ranges, however, do not reflect the exact day and month that a work site either acquired or lost its status as a DOE facility, and are not considered binding on OWCP in its adjudication of individual claims under EEOICPA. Rather, they are presented in this notice for the sole purpose of informing the public of the current results of OWCP’s research into the operational histories of these work sites, some of which extend back to the establishment of the Manhattan Engineer District of the U.S. Army Corps of Engineers on August 13, 1942. OWCP’s efforts in this area are continuing, and it expects that the date ranges included in this notice will change with the publication of future notices.

DOE facilities appearing on the lists that have undergone environmental remediation at the direction of or directly by DOE are identified by the following symbol—†—after the date range during which such environmental remediation occurred. During those periods, only the work of employees of DOE contractors who actually performed the remediation is “covered work” under EEOICPA.
